

MARKET REPORT – WEEK 27

BASED ON SALES AND PURCHASES OF VESSELS WEEK ENDED FRIDAY 9TH JULY 2021.

The BDI managed a further small +0.5% gain last week. The BCI and BHSI were the upward movers by +6.5% and +6.2% respectively, while the BPI and BSI moved down by -4% and -1.5% respectively but more sleep will be lost by the Italians celebrating their Euro 2020 win than panamax and supramax owners who remain confident that the dry freight markets will all continue to gain for some time yet to come. Congratulations Italy!!!

There is nothing new or significant to report in the S+P second hand markets whereby bulkers continue to consistently change hands at ever improving values while on the tanker side very few sales are reported each week although there is an underlying feeling it cannot be much longer before cash buyers / investors decide to deal at such depressed values with a view to the potential asset value and chartering profits to be made as soon as consumption of crude and its products starts to return to pre Covid levels.

Levels offered by the two strongest subcontinent ship recycling countries, Bangladesh and Pakistan, have increased even further with Bangladesh now taking back its number one position by offering levels ranging \$570-590 per LDT while Pakistan has increased to region \$560-580 per LDT. It seems that the \$600 level could soon be breached due to the combined effect of higher domestic steel prices in the region and a lack of vessels being offered for scrap from the dry side because owners can earn such high freight while continuing to trade them. It should be noted however that these exceptional levels are not expected to become the norm and could reduce quickly as soon as domestic steel prices diminish and / or more vessels become available. The Indian recycling market is still lagging at only \$530-550 per LDT levels but continues to be the go-to location for HKC green recycling.

THE ABOVE INFORMATION IS GIVEN IN GOOD FAITH BUT WITHOUT GUARANTEE AS TO ACCURACY OF SAYING.
